The *Journal of Abnormal Child Psychology* is devoted to research and theory concerned with psychopathology in childhood and adolescence. Priority will be given to empirical investigations in etiology, assessment, treatment in the community and correctional institution, prognosis and follow-up, epidemiology, remediation in the educational setting, pharmacological intervention, and to studies related to ecology of abnormal behavior. The target populations will comprise subjects exhibiting a variety of neurotic and organic disorders, delinquency, psychosomatic conditions, and disorders of behavior in mental retardation. The journal will emphasize original experimental and correlational research. Significant case studies and brief reports detailing meaningful results of ongoing projects will be published from time to time.
